# CEMML on the Web

## CEMML Main Web Site

<http://www.cemml.colostate.edu>

The Center hosts a web site providing summaries of services available, current job openings, extensive reference material, and many related links. Our site has seven main components: Home Page, Information, News, Jobs, Links, Support Information, and Web Site Search.

The easiest method of navigating through our web site is to use the Quick Reference link found at the top of each page. The Quick Reference page offers brief descriptions and links to most pages. In addition, the date of last update is listed.

## CEMML Floristics Laboratory Web Site

<http://www.cemml.colostate.edu/floristics/index.htm>

CEMML web pages provide current descriptions of services in all areas of expertise. Visitors to the Floristics Laboratory web site, for example, can browse the CEMML herbarium, photo gallery, floristics lab personnel directory, and related links of interest.
